Experience

Technical Intern Sep 2026 – Present
Harnav Ventures LLP *Jaipur, Rajasthan*

- Built and deployed a responsive business website with Next.js and TypeScript, including product catalog pages and a contact inquiry workflow, to showcase product offerings and manufacturing capabilities.
- Achieved Lighthouse scores above 90 on both mobile and desktop audits through performance and responsive UI optimizations.
- Implemented technical SEO: metadata, canonical URLs, Open Graph tags, and structured data.

Shopify Developer Intern Jun 2026 – Aug 2026
The Tasty Millets *Jaipur, Rajasthan*

- Improved storefront rendering performance by lazy-loading images and splitting JavaScript bundles.
- Optimized static asset delivery, reducing average page load time by 46% and improving the Lighthouse performance score from 49 to 76.
- Collaborated with a 5-member design team to deliver 8 production components in a 12-week sprint cycle.

Full Stack Intern Mar 2026 – Jun 2026
Next Learn Technologies *Remote*

- Developed full-stack application features using React, REST APIs, and a database-backed backend.
- Implemented backend functionality and API integrations, and collaborated on debugging and testing to improve application reliability.

Projects

Tunnel | *Next.js, Node.js, RTMP, HLS, MongoDB, Docker* | Live | GitHub Jun 2026 – Present

- Built a live-streaming platform with RTMP ingestion and HLS-based video delivery for streams originating from OBS.
- Separated stream ingestion, backend APIs, and HLS delivery into distinct services to organize the streaming workflow.
- Wrote k6 load-test scripts for the HLS delivery endpoints and used them to investigate streaming failures.

OpenLink | *TypeScript, Node.js, Express.js, Zod, Gemini API* | GitHub Sep 2026 – Present

- Built an AI API middleware in TypeScript that exposes a unified interface for model providers, with Gemini as the first integrated provider.
- Implemented a provider registry and adapter interface to support a pluggable model-integration architecture.
- Verified Gemini text-generation requests using curl, returning normalized provider responses.
- Added Zod-based request validation and centralized error handling for consistent API behavior.

Education

Poornima University Jaipur, Rajasthan
B.Tech in Artificial Intelligence and Data Science *Aug 2023 – Expected May 2027*

Technical Skills

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive Design
Backend & APIs: Node.js, Express.js, REST APIs, Zod
Databases: MongoDB, SQL
Languages: Python, Java
Tools: Git, GitHub, Docker, Vercel, Shopify, Lighthouse, k6

Achievements

- Selected for Sentry's Open Source Program, contributing through Klyro. Proof
- Solved 430+ problems on LeetCode. and achieving a 1400+ contest rating.
